# Uplight Accessory

## Summary

The uplight accessory consists of an annular ring that reflects 15% of the downlight into a batwing distribution onto the ceiling. Indirect uplight provides greater visual comfort and enhanced environmental aesthetics, eliminating the cavern effect. Applications include retail spaces, gymnasiums, houses of worship and assembly spaces.

The accessory is sold separately and can be installed in the field without the need for tools. This feature enables flexibility for the end customer while minimizing the number of inventory items.

Constructed of polished aluminum and weighing less than a half-ounce, the accessory includes polycarbonate clips for secure attachment to the lamp.

## Compatibility

- Easy, snap-on design
- Compatible with all VALTO 400 and 600 products including "VL", "VH" and "Luminaire" series
- Compatible with all Power Level and CCT

## Mechanical

- 0.35 oz (10 grams)

## Assembly

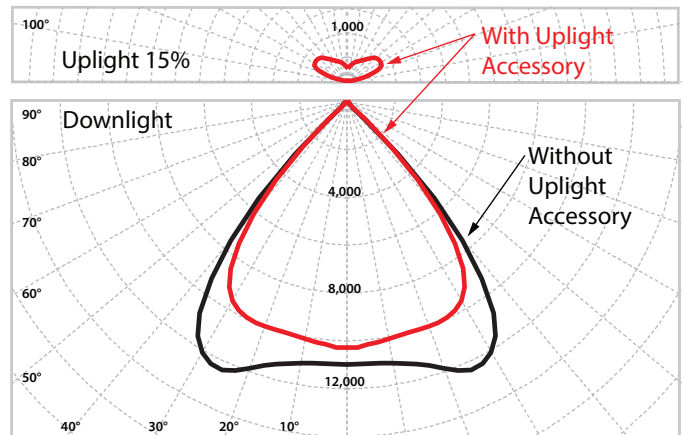

The accessory simply snaps onto the outer edge of the VALTO lens without the need for any tools. See video link for installation demo.

Video Instructions

## Example Optical Distribution for 150W / 20,000 Lumens

## Example Rendering

Traditional prismatic HID reflectors create a visually comfortable environment by providing uplight that eliminates the "cavern" effect in large spaces. The Filamento Uplight accessory avoids the latter effect, and is engineered to create a uniform area of light on the ceiling.
